EXECUTIVE SUMMARY

Engineering executive with 19+ years of experience building and scaling distributed platforms and technology organizations, managing engineering teams of up to 30+ across PayPal, Greenlight Financial Technology, and Lowe's. Track record of converting enterprise technology strategy into board-level outcomes: 85% reduction in operational costs, 90% acceleration of delivery cycles, and $100M+ in revenue-enabling initiatives. Directed platforms processing $500B+ in annual payment volume for 300M+ customers across 200+ countries, and led 8+ regulatory and international-expansion launches. Trusted by leadership to align multi-year technology roadmaps with business growth, drive vendor strategy, and build the leadership bench beneath them.

CORE COMPETENCIES

Executive Leadership: Team Building & Scaling (Teams up to 30+ Engineers) • Hiring & Performance Management (PIPs & Terminations) • Budget & Vendor Ownership • Stakeholder Communication • Cross-Functional Alignment • Change Management • Succession Planning

Strategy & Delivery: Technology Roadmapping • Platform Modernization • Regulatory Compliance & International Expansion • Vendor Strategy • Agile & Scrum at Scale (3+ teams)

Technical Architecture: Microservices & Distributed Systems • Event-Driven Architecture (Kafka) • Cloud Infrastructure (AWS) • API Design (GraphQL, REST) • CI/CD & DevOps • AI/LLM-Driven Automation

PROFESSIONAL EXPERIENCE

Senior Engineering Manager, Post-Purchases Platform *2025 – Present*

Lowe's

Managing 3 Scrum teams (30+ engineers); director-level scope over platform strategy, vendor decisions, and cross-functional delivery

- Eliminated vendor dependency for device rental infrastructure by architecting an in-house mobile device management platform, delivering $4M in annual cost savings and 50% efficiency gains in physical inventory audit operations
- Built an LLM-powered knowledge system serving 10,000+ store associates, improving first-contact resolution by 45% and reducing escalations by 35%
- Engineered an automation solution that cut troubleshooting effort by 80% and operational support tickets by 85%, delivering $2M+ in annual cost avoidance
- Delivered a real-time observability platform for operational stakeholders, cutting incident diagnosis and resolution time to under 5 minutes (6x faster than the legacy process)
- Designed event-driven infrastructure on Kafka processing 100k+ daily transactions across all retail locations
- Set full-stack technical standards (React, Ionic, Node.js, Java) and owned hiring and performance management for the team, including interviews, PIPs, and terminations when necessary

Director of Software Engineering, Platform Modernization *2023 – 2024*

Greenlight Financial Technology

Owned engineering strategy across 3 product pods serving 50,000+ active customers

- Led platform modernization from monolith to microservices, achieving 5x release velocity (monthly to daily) and supporting 3x customer acquisition growth (15k to 45k monthly onboarding)
- Directed a GraphQL-based server-driven UI architecture that decoupled frontend from backend releases, cutting feature delivery cycles 40% and lifting developer productivity 30%
- Drove enterprise CI/CD and Kafka-based event streaming adoption, compressing deployment cycles from 2 hours to 10 minutes and enabling true continuous delivery
- Partnered with Product and Operations leadership to align the technical roadmap with revenue objectives, delivering 12+ platform capabilities against business growth targets

- Owned hiring and performance management across 3 product pods, including interviews, PIPs, and terminations when necessary, to build and sustain a high-performing engineering organization.
-

Senior Software Engineering Manager, SaaS Platform *2023*
Hyphencare via Tuya Infotech
Owned end-to-end delivery (frontend, backend, cloud) for a healthcare SaaS platform with 12+ engineers

- Served 5,000+ enterprise healthcare customers across the full technology stack.
- Led AWS cloud migration strategy, raising platform availability from 98.5% to 99.8% SLA while cutting infrastructure costs by 35%
- Established enterprise-grade CI/CD pipelines and production monitoring, accelerating feature delivery velocity 2x while lowering deployment risk

Software Engineering Manager, Level 2 *2011 – 2023*
PayPal Inc.
Managed global teams of 10 – 15 engineers across multiple product pods

- Directed mission-critical payment, onboarding, checkout, and compliance systems processing 100k+ transactions per second and $500B+ in annual payment volume for 300M+ customers in 200+ countries
- Launched 8+ regulatory compliance and international-expansion initiatives (UK, EU, Asia-Pacific), directly generating $100M+ in annual revenue and opening new geographic markets
- Architected a GraphQL API platform and reusable component libraries adopted by 200+ engineers, cutting development cycles by 6 weeks and lifting engineering productivity by 35%.
- Delivered the PayPal Shopping hybrid mobile app (React, GraphQL, Swift, Kotlin) to 10M+ monthly active users, sustaining a 4.7-star app-store rating
- Re-architected event-driven Kafka infrastructure to scale 10x (10k to 100k+ transactions/second) without a redesign, maintaining 99.99% uptime
- Built observability and operational tooling across every onboarding flow, giving dependent teams the autonomy to self-diagnose issues, cutting incident resolution time by 50% and improving fault detection by 40%.
- Owned hiring and performance management across teams of 15 engineers, including interviews, PIPs, and terminations when necessary, and built the talent pipeline by mentoring 15+ engineers into senior and staff engineer roles

Senior Software Engineer *2006 – 2011*
PayPal via Computer Sciences Corporation (CSC)

- Built enterprise web applications integrating frontend interfaces with Java-based backend services.
- Contributed to large-scale client implementations and production support activities.

EDUCATION

Master of Computer Applications (MCA) — Anna University, India, 2006
Bachelor of Computer Applications (BCA) — University of Madras, India, 2003
